

How do I ensure successful transfers from GoDaddy?

Author:
Webservio Inc.

Created On: 19 Sep 2012 11:52 AM

If you are transferring from GoDaddy.com, here are some tips to help ensure your transfer is successful.

- 1) After you approve Webservio's confirmation email, you will also receive a confirmation message from GoDaddy.com.
- 2) GoDaddy will send their confirmation email to 'AdminContactVariable.'
- 3) You will have 72 hours to approve the email that GoDaddy sends you.
- 4) For .biz, .info or .org domains you must contact GoDaddy.com to obtain your Authcode for the domain (needed for transfer). <https://www.godaddy.com/gdshop/support.asp>

Note:

45/60 Day Holds:

- o If a domain is transferred to GoDaddy, they will put a transfer hold on the domain for 60 days.
- o If there has been an ownership change, the domain cannot be transferred for 60 days.
- o If domain was renewed after the expiry date, the domain cannot be transferred during the 45 day grace period after the expiry date.

Auth Codes: .biz, .info & .us domain names will be charged for the second year renewal if they are transferred away from GoDaddy in the first year
