Yes. Webmail allows you to read and send emails using a Web browser. All you would require is an Internet connection and a Web browser (such as Internet Explorer or Safari or Mozilla Firefox).To access your email through the Web, please use the following steps:

a.) Open a browser such as Internet Explorer or Mozilla Firefox

b.) Please enter one of the following 2 links as setup by our support group.

 http://mail2.webcentric-tn.com:8383 OR http://mail3.webcentric-tn.com:8383 .

c.) Login using your complete email address as the user ID. For example, if your email address is john@test.com, then the user ID on the above webmail login page is john@test.com.
