Sometimes, outlook express blocks attachments and hence does not allow you to view them. It may give out a message something like this:

To resolve this issue, you need to turn off the "Do not allow attachments to be saved or opened that could potentially be a virus" option:

- 1.) Start Outlook Express 6.
- 2.) On the Tools menu, click Options.
- 3.) Click the Security tab, click to clear the Do not allow attachments to be saved or opened that could potentially be a virus check box under Virus Protection, and then click OK.

Now close Outlook Express 6 and the settings will take place once you restart the email client.
