See the article What is FTP and how do I use it? for general information about FTP.

- » Start Filezilla and choose "Site Manager..." from the File menu
- » Click on the "New Site" button and type in a name for the site
- » In the "Host" box, type in the hostname or IP provided in your set-up documentation
- » From the "Protocol" dropdown, select "SFTP - SSH File Transfer Protocol"
- » From the "Logon Type" dropdown, select "Ask for password"
- » Enter the Username provided in your set-up documentation
- » Click the "Connect" button
- » When prompted, enter the Password provided in your set-up documentation
- » When connecting for the first time, you should see a pop-up "Unknown host key", click OK
