Registering a new domain is easy and affordable. If you already have an account in the Webservio Billing Portal, please see [How to register a new domain name through the Webservio Billing Portal](#). Otherwise, use the steps below to find and purchase an available name.

If you are only purchasing the domain registration(s):

- » Use our domain finder tool at <http://services.webservio.net/domain-registration/index.php> Just type in possible domain names, select any extensions you would be interested in, and click Search for Domain Name(s). The tool will show you all available domain names similar to your query.
- » Once you have decided on the domain name(s) you would like to purchase, you may click Select to add the domains to your cart.
- » Click Checkout and follow the prompts to set up an account and complete the purchase.

If you wish to purchase other services:

- » Navigate to the service page and select the plan option you wish to purchase. Once you initiate the Checkout process, it will give you the option to register a new domain.
- » Select "I want to buy a new Domain Name". Type in the domain name you would like to purchase and click Continue to Checkout.
- » The tool will show if the domain is available and any other available domains that are similar.
- » Once you have decided on the domain name(s) you would like to purchase, you may click Select to add the domains to your cart.
- » Click Checkout and follow the prompts to set up an account and complete the purchase.
