

Does Webservio backup my website?

Author:
Webservio Inc.

Created On: 07 Feb 2017 11:28 PM

We routinely perform onsite backups of all servers on a good faith effort. BUT unless your contract includes a managed backup service, any data restores will be subject to hourly engineering rates. In addition, there is no guarantee that a backup will be available for the desired time frame. We recommend downloading a copy of your website after making any changes. Alternately, your account representative can provide you with information regarding our managed backup options.
