Webservio has three different systems for domain management:

A. For most domains, you can access domain management tools via https://billing.webservio.net
B. If your domain is registered through services.webservio.net, you can access domain management tools via http://services.webservio.net
C. If your domain is on the legacy OpenSRS system, you can access domain management tools via https://manage.opensrs.net

What if I don't know which system to use?

» Go to https://whois.com
» At the top right, enter your domain name and click the green button.
» Under Domain Information, look to see who the Registrar is for your domain.

» PDR LTD. D/B/A PUBLICDOMAINREGISTRY.COM - use system A but if you do not have an account there, you may need to use system B

» ENOM, INC. - use system A
» TUCOWS DOMAINS INC. - use system C
