1. Configure SMTP SmartHost in your primary mail server to point to: smtp.antispamcloud.com (port 587/465/25)

SMTP Smarthost: smtp.antispamcloud.com (port 587/465/25)

See the following How-To articles based on your Exchange server type:

[Exchange 2003](#)[Exchange 2007 and 2010](#)[Exchange 2013 and 2016](#)

2. Configure your SPF record:

SPF Record: v=spf1 include:spf.antispamcloud.com -all
